Chief, FBIB

Interference from Air Force Radioteletype Transmitter AUG

1. For the past two years FBIB has been monitoring German language voice broadcasts from the Soviet-controlled radio Leipzig, which transmits on the frequency 9728 kilocycles. The monitoring is done between the hours of 22:00 and 03:15 EST.

2. For the past week, monitoring of Leipzig has been impossible because of interference from a radioteletype transmitter on 9730 kilocycles using the call letters AUG, which has been identified as the U.S. Air Force, Fort Worth, Texas. AUG has been heard sending test tape almost continuously during the above mentioned period of monitoring.

3. It is recommended that AUG be informed, through appropriate channels, of CIA interest in this frequency, and requested to avoid unnecessary use of it between 2200 and 0315 EST, or at least during the specific periods 2200-2215, 2300-2315, 0000-0015 and 0200-0215.
